

Remedial Classes: A Report

2024-25

As per the directions of the Principal, remedial classes were conducted during the academic session 2024-25 for academically weak students, compartment students, and lateral entry students across almost all subjects. These classes were organized with the objective of helping students cover missed lessons, strengthen their understanding of core concepts, and improve their performance in the University Examinations.

Special attention was given to individual learning needs, and systematic efforts were made to clarify doubts and reinforce fundamental topics. The records of remedial classes, including daily attendance, were properly maintained by the respective subject teachers.
