

Report on the Use of ICT Room for Classes (Session 2024–25)

During the academic session 2024–25, the Principal directed all teachers to conduct classes in the ICT Room. The campus is Wi-Fi enabled, which helps teachers use online resources during teaching. A time table was prepared by the office, according to which every teacher was required to take one ICT-based class every week using PPT, online resources, or virtual teaching methods.

All teachers conducted their classes as per the time table and maintained individual records of these classes. The use of the ICT Room made teaching more interactive and effective for students.
